Merrimack Station Briefing

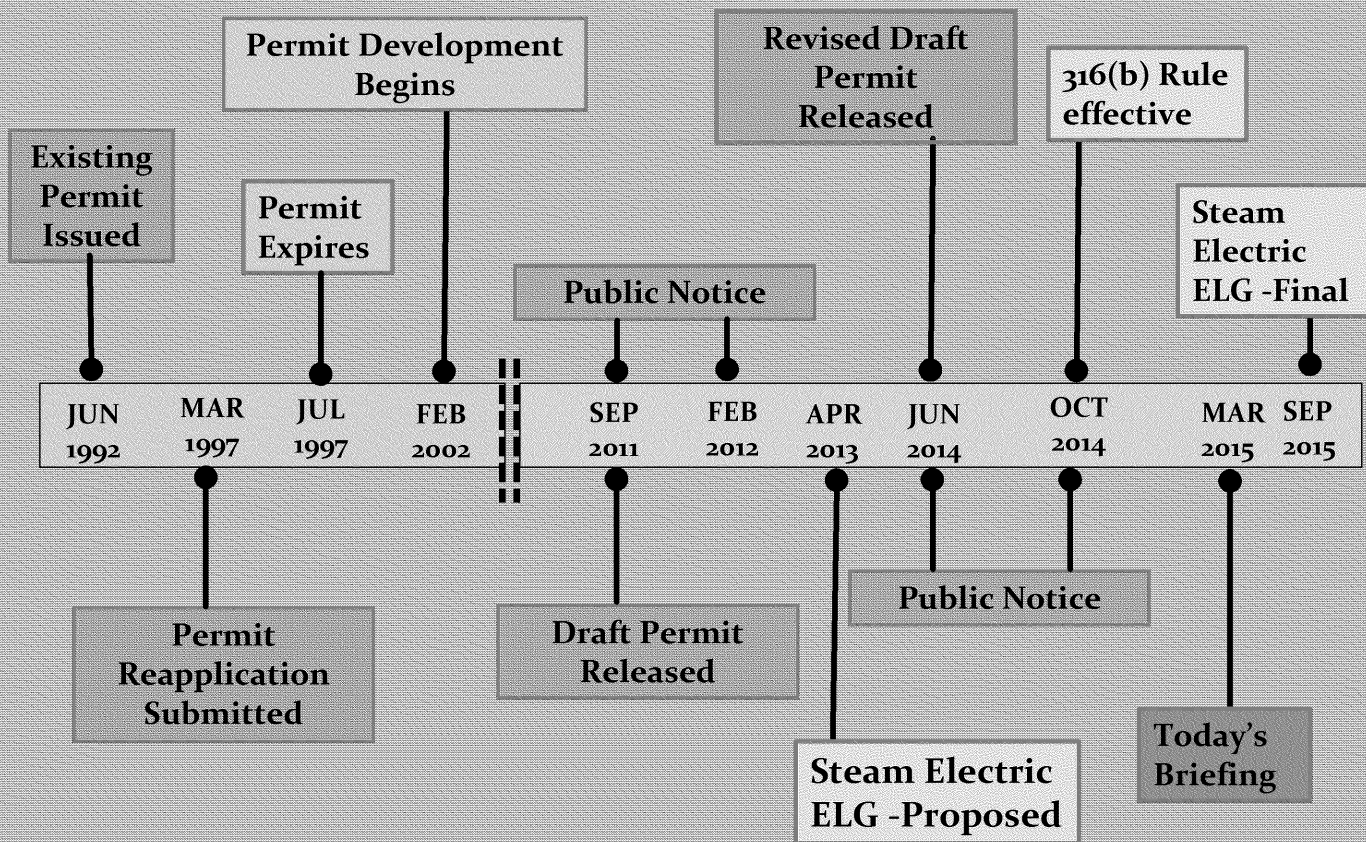

Deliberative process

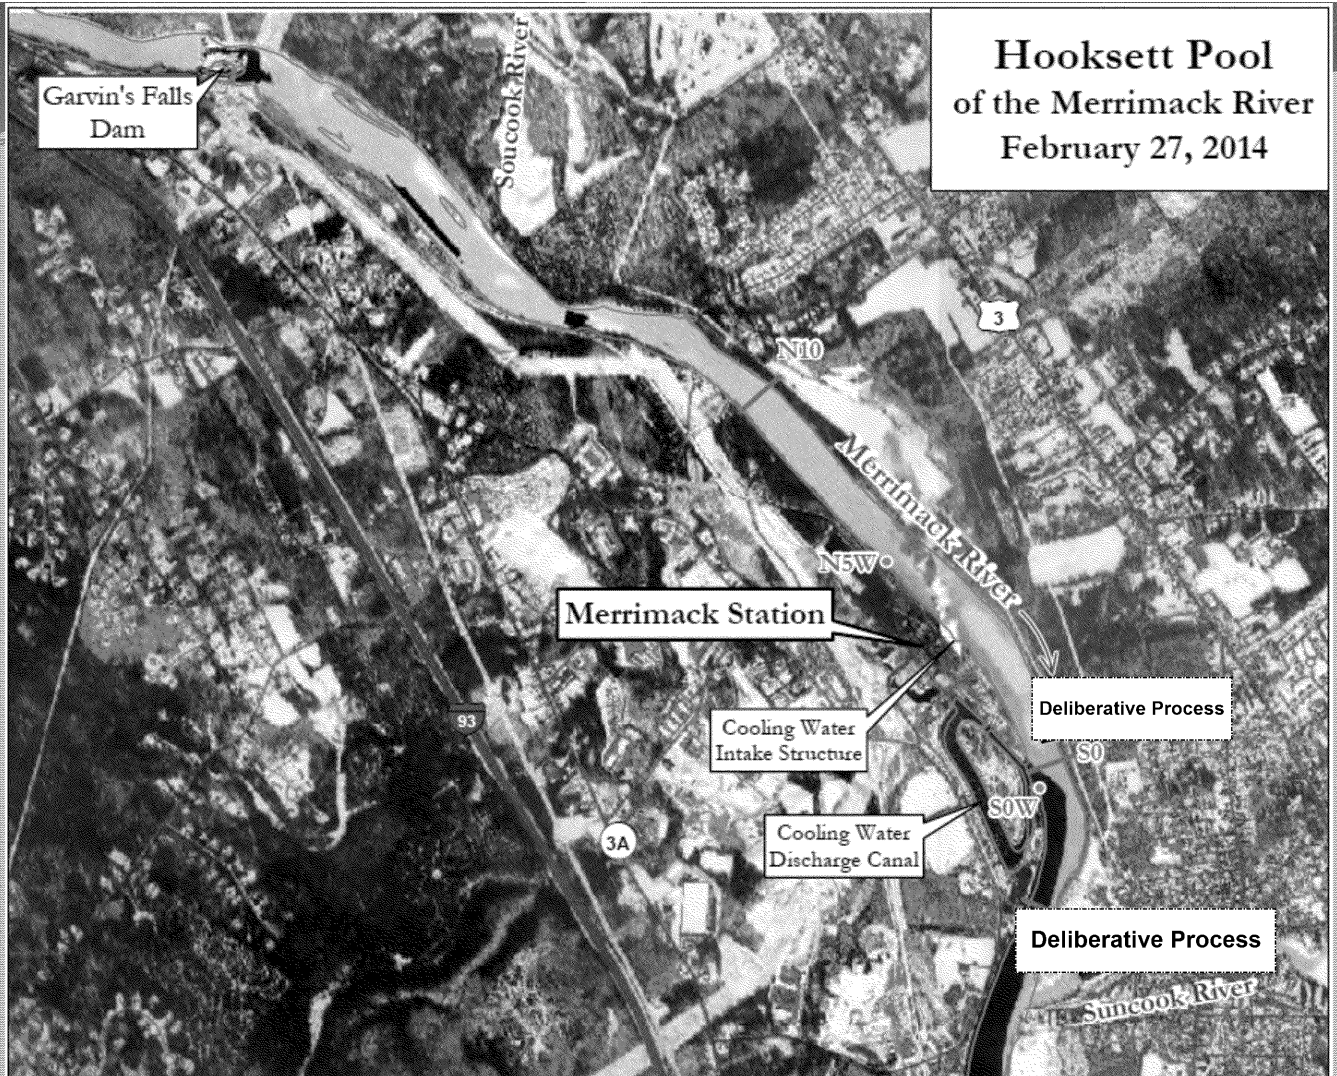

The Facility

- * 470 MW coal-fired. Unit 1 -1960, Unit 2 – 1968
- * Owned by PSNH. Northeast Utilities is now Eversource Energy
- * Considered a base load facility but currently operating at reduced capacity
- * Withdraws and discharges ~287 MGD non-contact cooling water altering the river's thermal profile and entraining and impinging aquatic organisms
- * In 2011, PSNH installed and began operating a wet FGD scrubber at Merrimack Station. By June 2012, a VCE system was operating to reduce/eliminate the FGD discharge
